Thanks for downloading
this product.

Layer Color Guide

Green

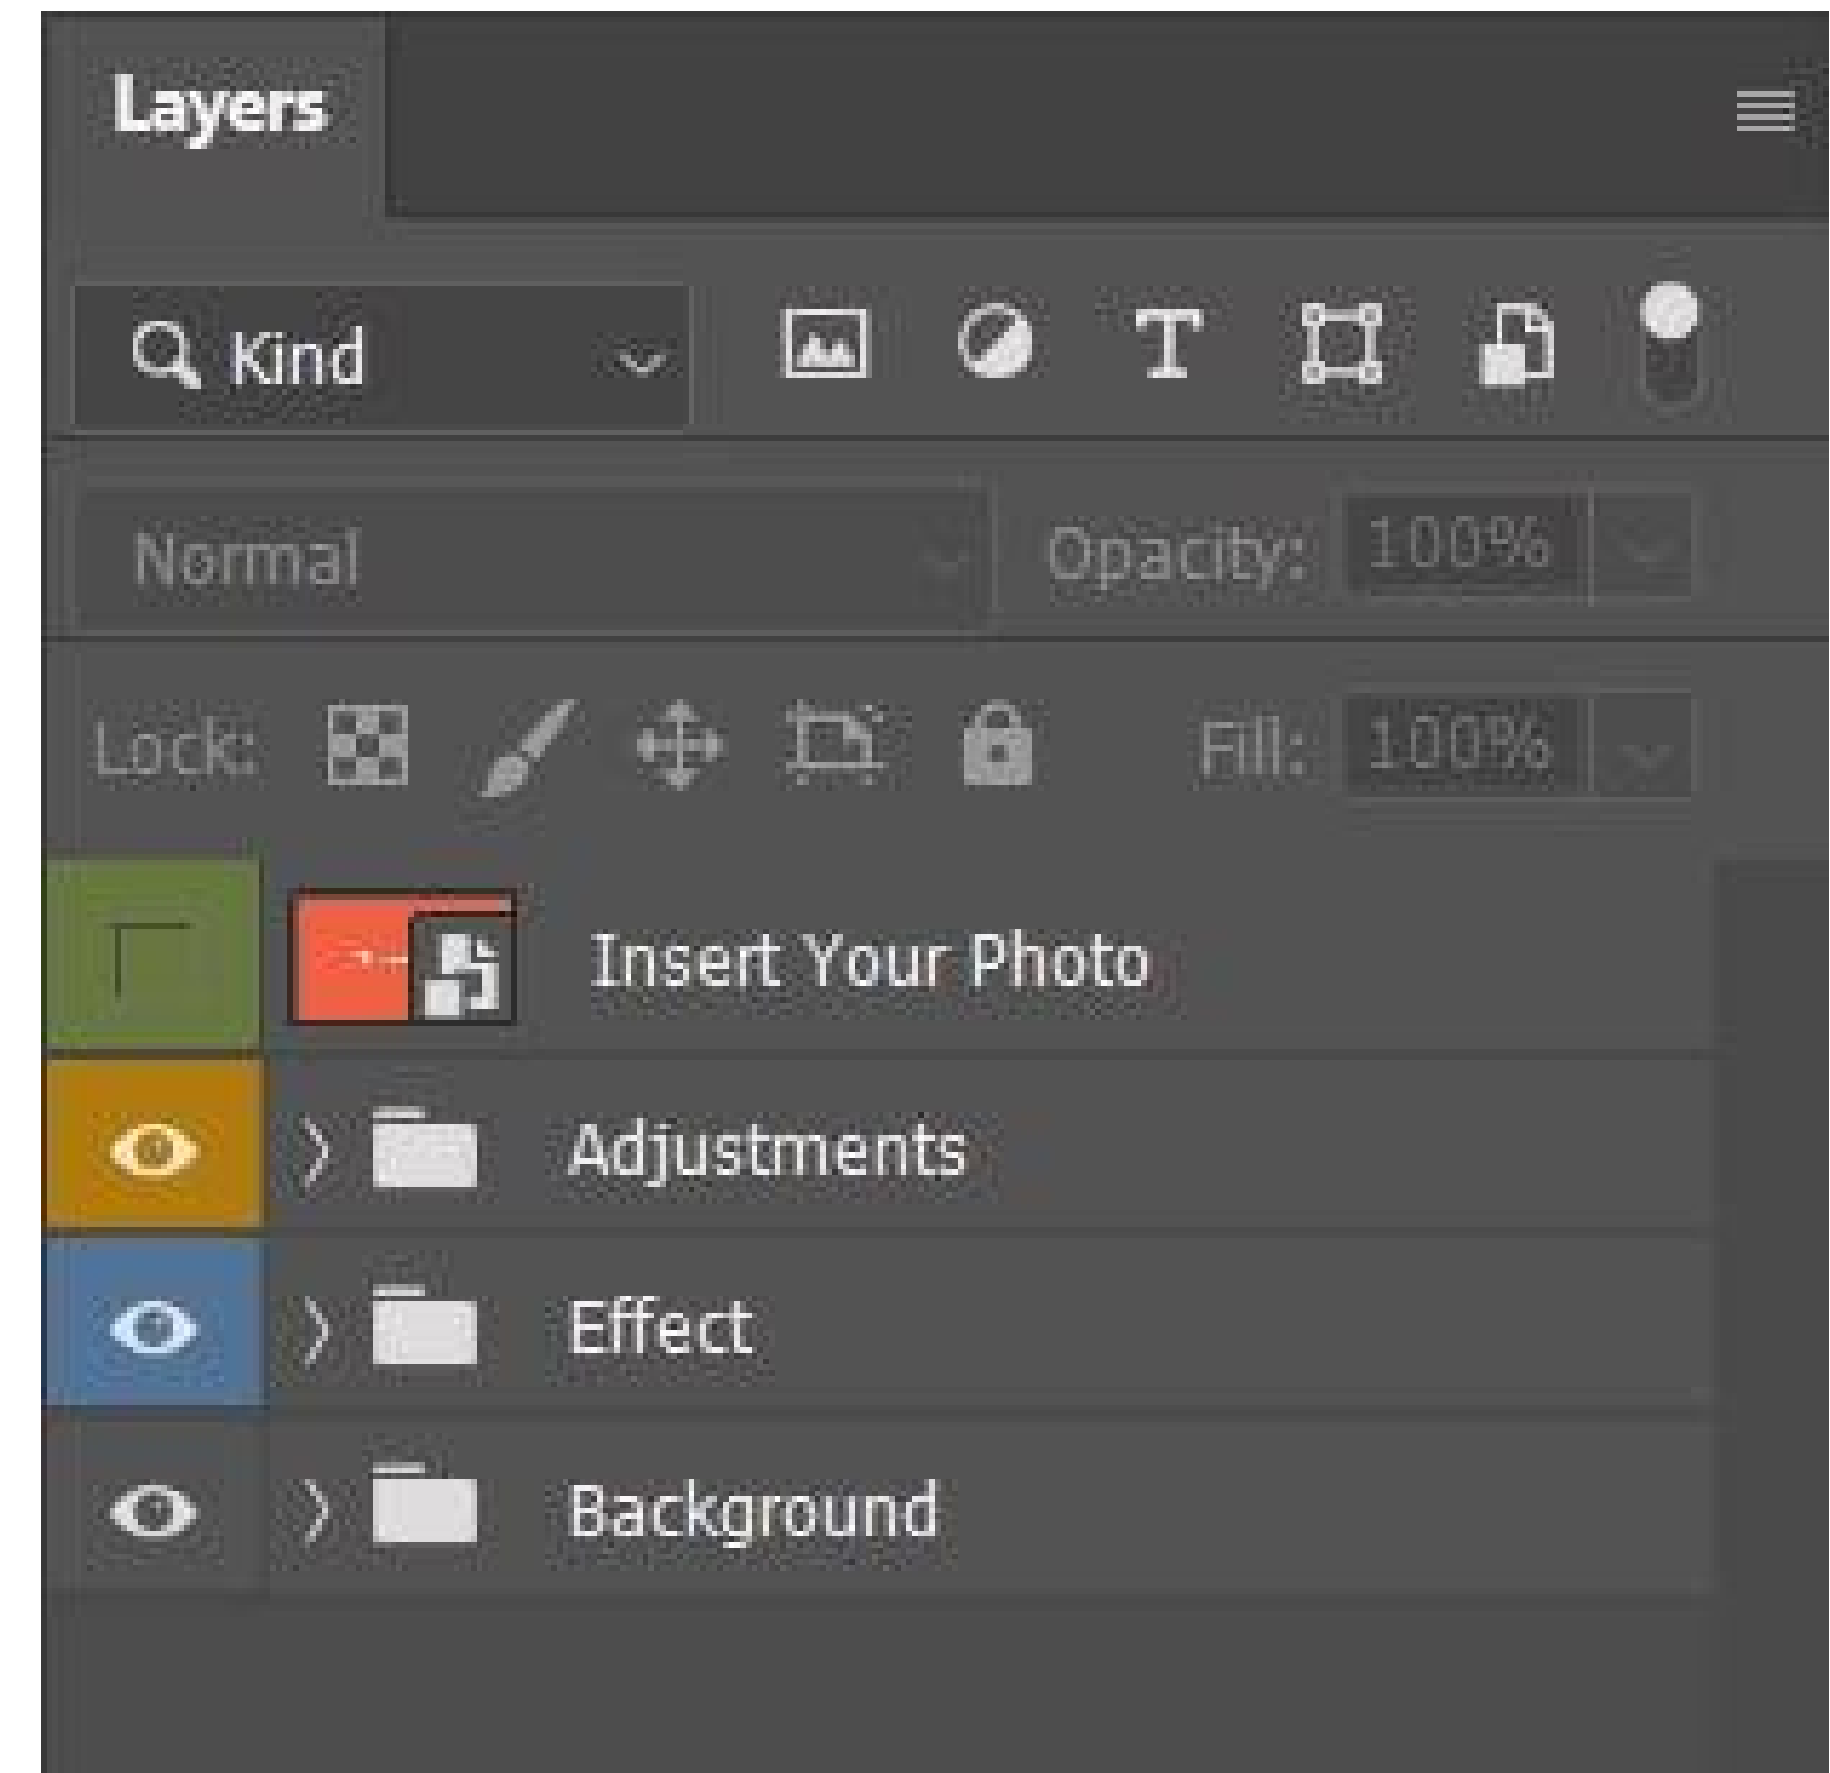

for insert your photo

Orange

for adjust brightness, curves, levels, etc.

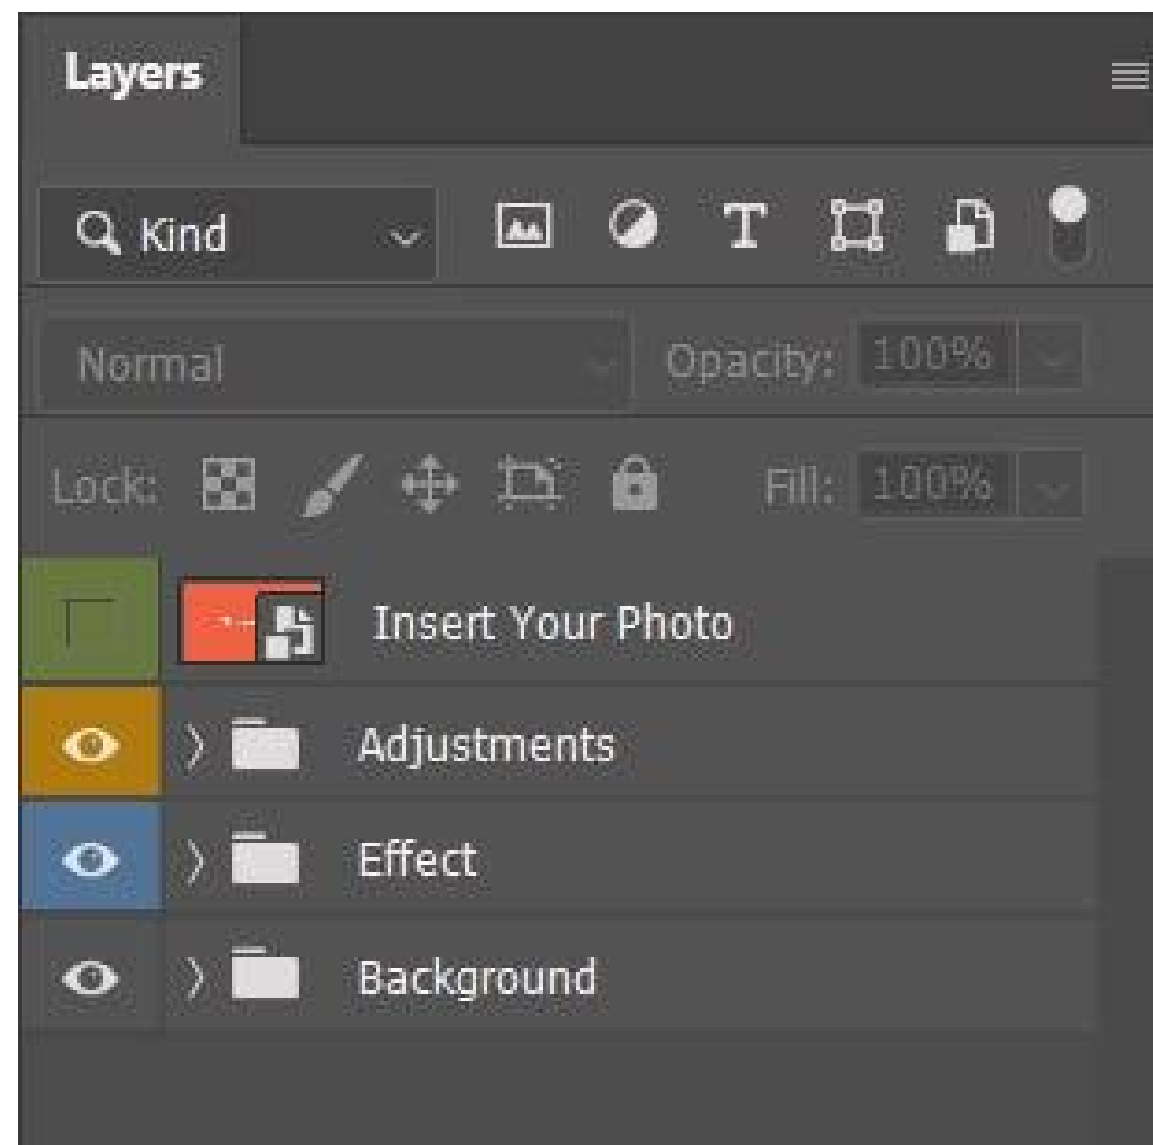

Blue

for effects or template objects (not required to be replaced, but still editable)

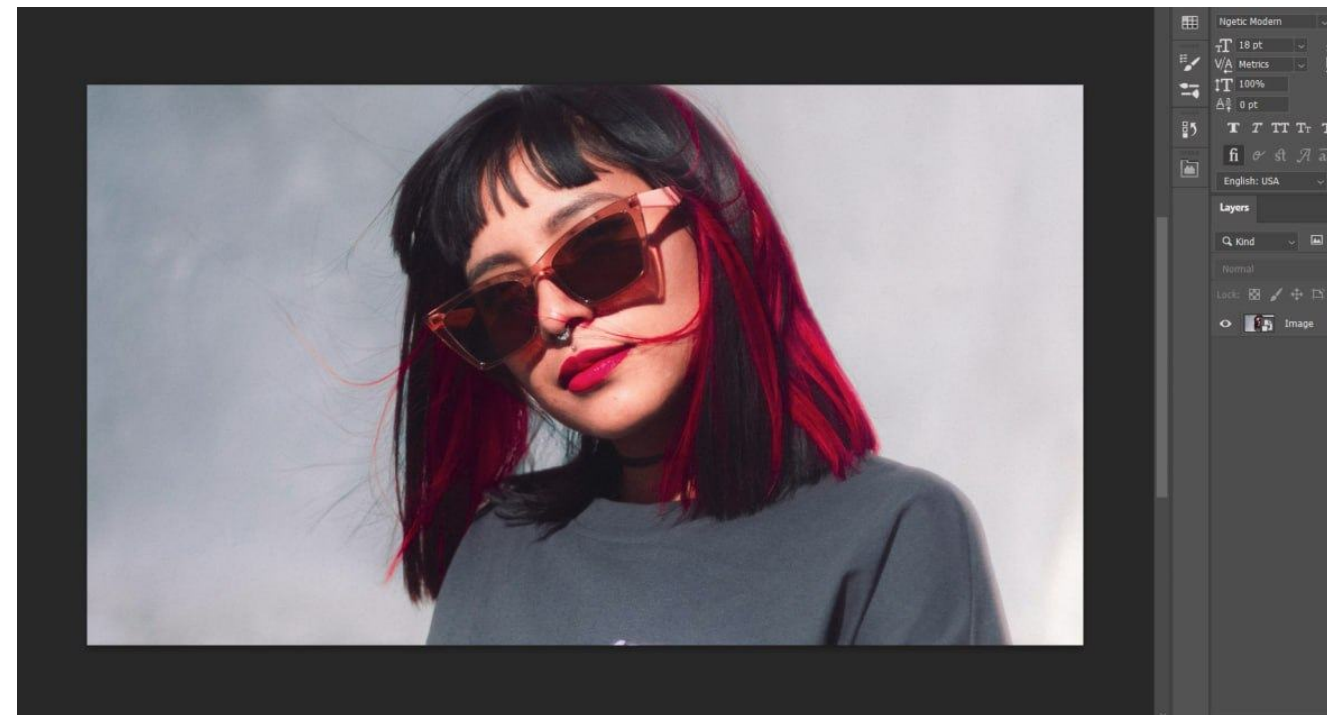

How to use our PSD Photo Effect

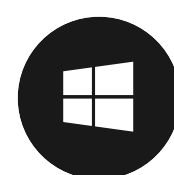

1. Open the PSD file in Photoshop.
2. Go to the Layers Panel.
3. Find the layer named “Your Photo Here” (Smart Object)

4. Double-click it — a new tab will open.

5. Place your image in that tab and adjust the size.
6. Press CTRL+S for Windows or CMD+S for Mac to save.

CTRL+S

CMD+S

7. Go back to the main file — your photo effect will update automatically.

Notes:

- Works with Photoshop CS6 and above.
- Use high-resolution images for the best result.
