

Radiant Logo

After Effects Template — Help Guide

1. Project Structure

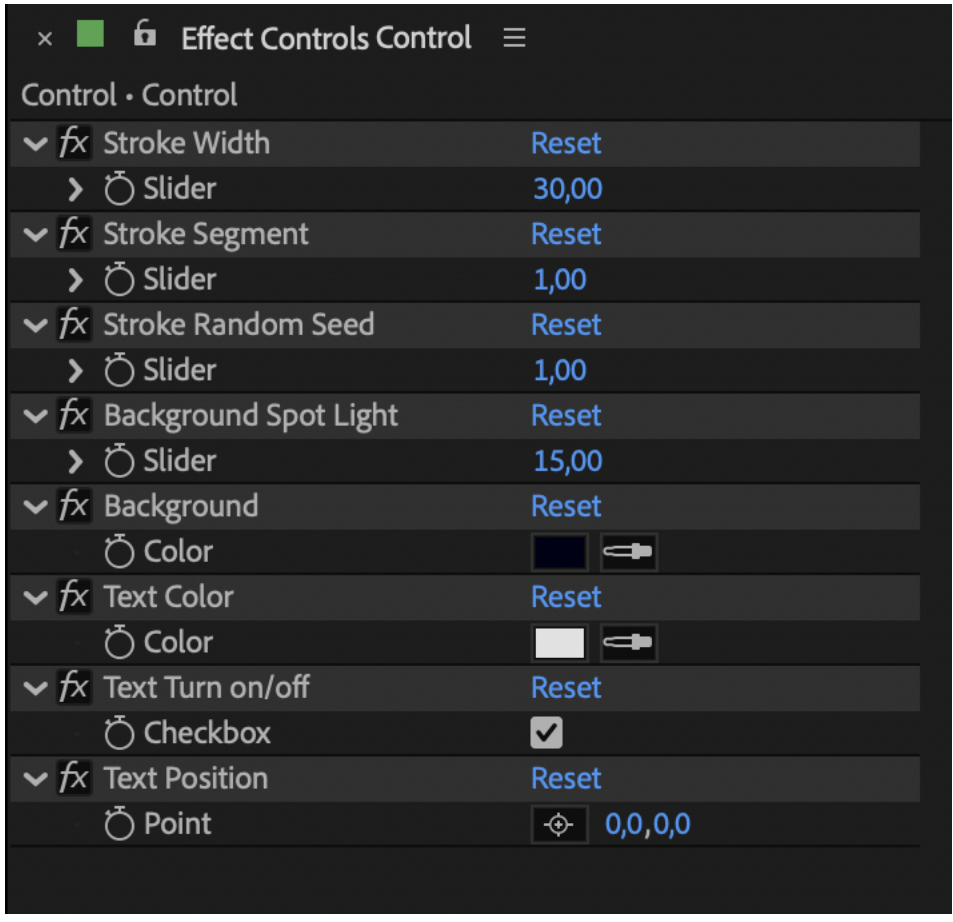

Open the project in After Effects. You will see three main folders in the Project panel:

1. Edits Your working area — all editing is done here
2. Renders Final output compositions — render from here
3. Others Internal components — do not modify

Inside 1. Edits you will find three compositions:

- Control — color and animation settings
 - Logo — your logo placeholder
 - Text — your tagline text
2. Color & Animation Controls — Options Layer

Open the Control composition. Select the Control layer and look at the Effect Controls panel. All settings are adjusted here — no need to go inside other compositions.

Colors:

Background	#000116	Deep dark blue — the background fill color
Text Color	#E2E2E2	Light gray — color of the tagline text

Sliders & Controls:

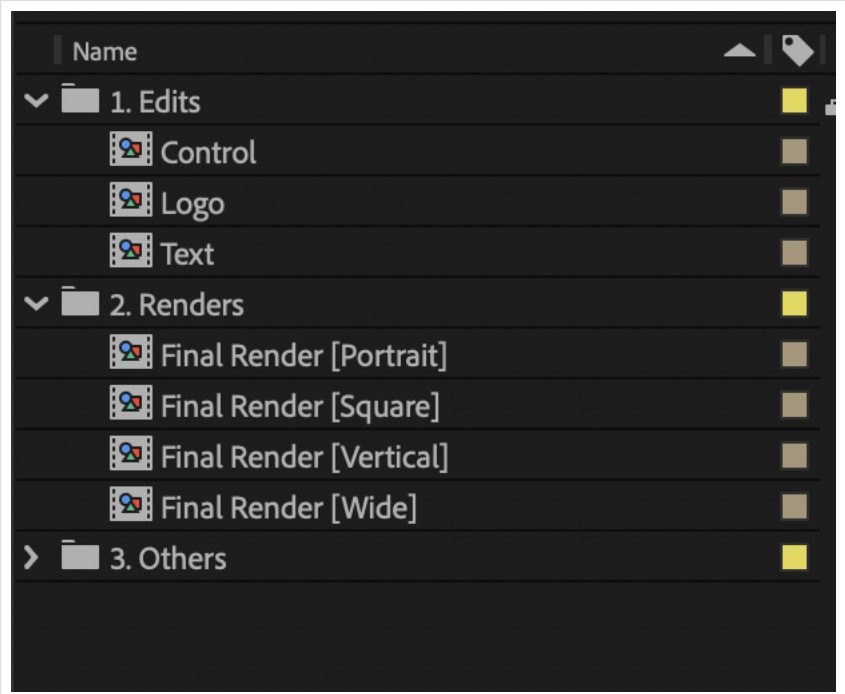

Stroke Width	30	Thickness of the animated stroke lines around the logo
Stroke Segment	1	Number of stroke segments in the animation
Stroke Random Seed	1	Changes the randomized pattern of strokes (try different values)
Background Spot Light	15	Intensity of the center spotlight glow behind the logo
Text Turn on/off	On	Checkbox — show or hide the tagline text
Text Position	[0,0]	Fine-tune the tagline position (X, Y offset)

3. Logo Placeholder

Open the Logo composition. This is where you place your logo.

1. Open the Logo composition
 2. Select the logo layer ("a") — this is a placeholder text showing as a logo shape
 3. Go to File → Import and bring in your logo file (PNG with transparency recommended)
 4. Drag your logo file into the Logo composition and position it at the center
 5. Delete or hide the placeholder layer "a"
- Keep your logo centered in the composition frame for the animation to work correctly.

4. Edit Tagline Text

Open the Text composition to change the tagline below your logo.

Text

→ Your brand tagline or slogan

■ Open the Text comp → select the Text layer → double-click to edit → type your text → press Escape when done. Do not change the font size, tracking, or layer effects.

To hide the tagline completely, go to the Control composition and uncheck Text Turn on/off in the Effect Controls panel.

5. Render Instructions

Four render formats are available. Open the 2. Renders folder and choose the format you need:

Final Render [Wide]	3840×2160 (4K)	YouTube, website, widescreen
Final Render [Vertical]	1080×1920	Instagram Reels, TikTok, Stories
Final Render [Square]	1080×1080	Instagram feed, Facebook
Final Render [Portrait]	1080×1350	Instagram portrait feed

1. Select your desired render comp from the 2. Renders folder
2. Press Ctrl+M (Windows) or Cmd+M (Mac) to add it to the Render Queue
3. Set Output Module to your preferred format (H.264 recommended for MP4)
4. Set Output To — choose your save location
5. Click Render

Render at the highest quality settings for best results. Use lossless for editing workflows.

6. External Files

This template uses the following external resources:

- Font: Poppins (SemiBold) — see Links file for download
- Music: Soft Piano Logo by raspberrymusic — see Links file for purchase link
