

HELP FILE

Requirements

Adobe After Effects 2024 or higher

Required Font: **Inter**

Install the font before opening the project.

Font Link:

<https://fonts.google.com/specimen/Inter>

Project Structure

01_EDIT_HERE

Contains all editable compositions.

CARD_##

- Edit text
- Customize scene settings

MEDIA_##

- Replace images and videos

02_MAIN_COMP

Contains the final composition:

MAIN_RENDER

Used for previewing and rendering the complete project.

03_DO_NOT_EDIT

Contains internal project compositions required for the template to function correctly.

Do not modify compositions inside this folder.

Replacing Images & Videos

Location:

01_EDIT_HERE > CARD_## > MEDIA_##

1. Open **MEDIA_##**.
2. Import your image or video.
3. Drag and drop the media into the composition.
4. Adjust scale and position if necessary.
5. Return to **MAIN_RENDER** to preview the result.

To replace media while preserving animation and layer settings:

1. Select the existing media layer.
 2. Hold **ALT**.
 3. Drag the new media directly onto the selected layer.
-

Editing Text

Location:

01_EDIT_HERE > CARD_##

Double click any text layer and type your own text

Return to **MAIN_RENDER** to preview the result.

Previewing The Project

Location:

02_MAIN_COMP > MAIN_RENDER

Open **MAIN_RENDER** to preview the complete project exactly as shown in the preview video.

Rendering The Complete Project

Location:

02_MAIN_COMP > MAIN_RENDER

1. Select **MAIN_RENDER**.
 2. Choose **Composition > Add To Render Queue**.
 3. Select an output location.
 4. Adjust render settings if required.
 5. Click **Render**.
-

Notes

- Install the required font before opening the project.
- Perform all customization inside **01_EDIT_HERE**.
- Use **MEDIA_##** compositions for image and video replacement.
- Use **MAIN_RENDER** to preview and render the complete project.
- Do not modify compositions inside **03_DO_NOT_EDIT**.
