

How to use our mockup?

We try to work on each mockup in a personalised way so that the result is as realistic as possible. You will see many layers. Don't worry! We will guide you through each step so you can get the most out of the image you have in your hands.

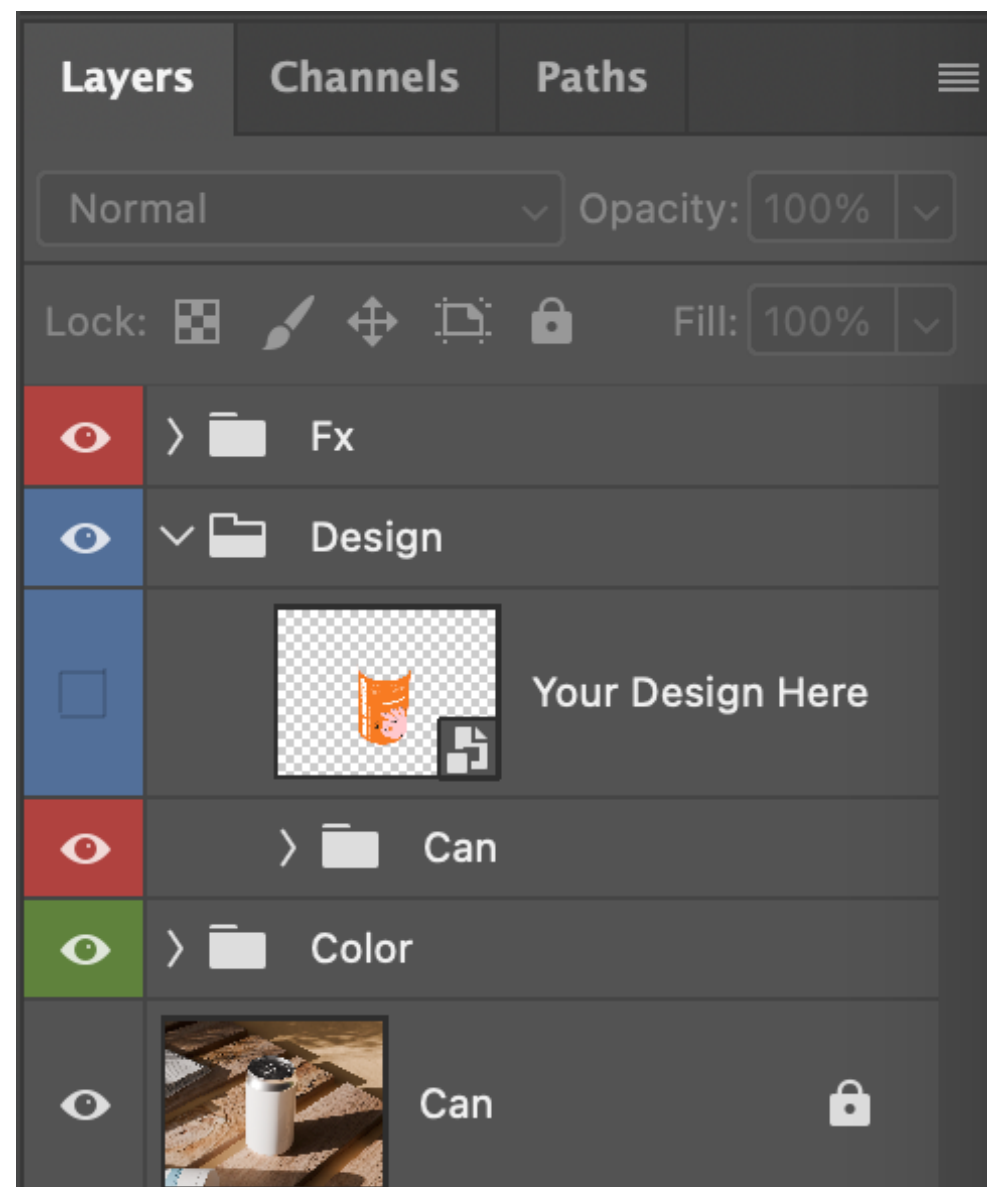

First steps: delete the welcome layer

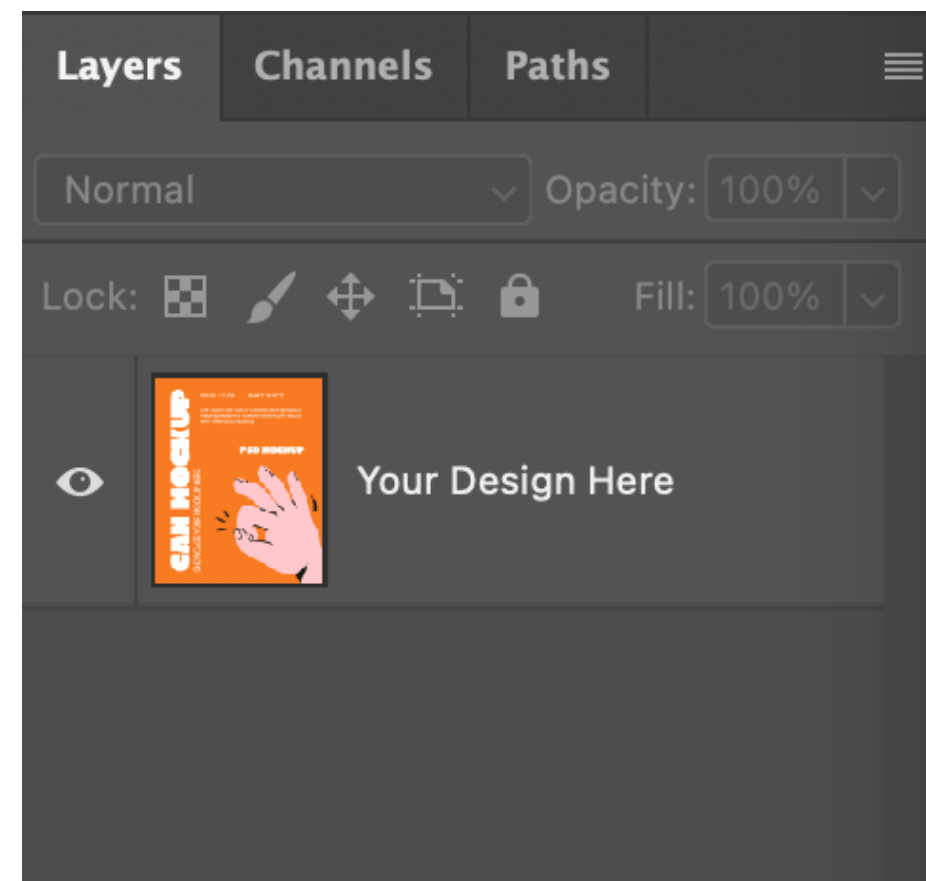

When we open the psd, maybe we will find a welcome message on a white background.

This layer helps us to make the size of the psd smaller. This helps to speed up the downloads. Select the layer, unlock it and send it to the trash.

Getting the job done: add your design

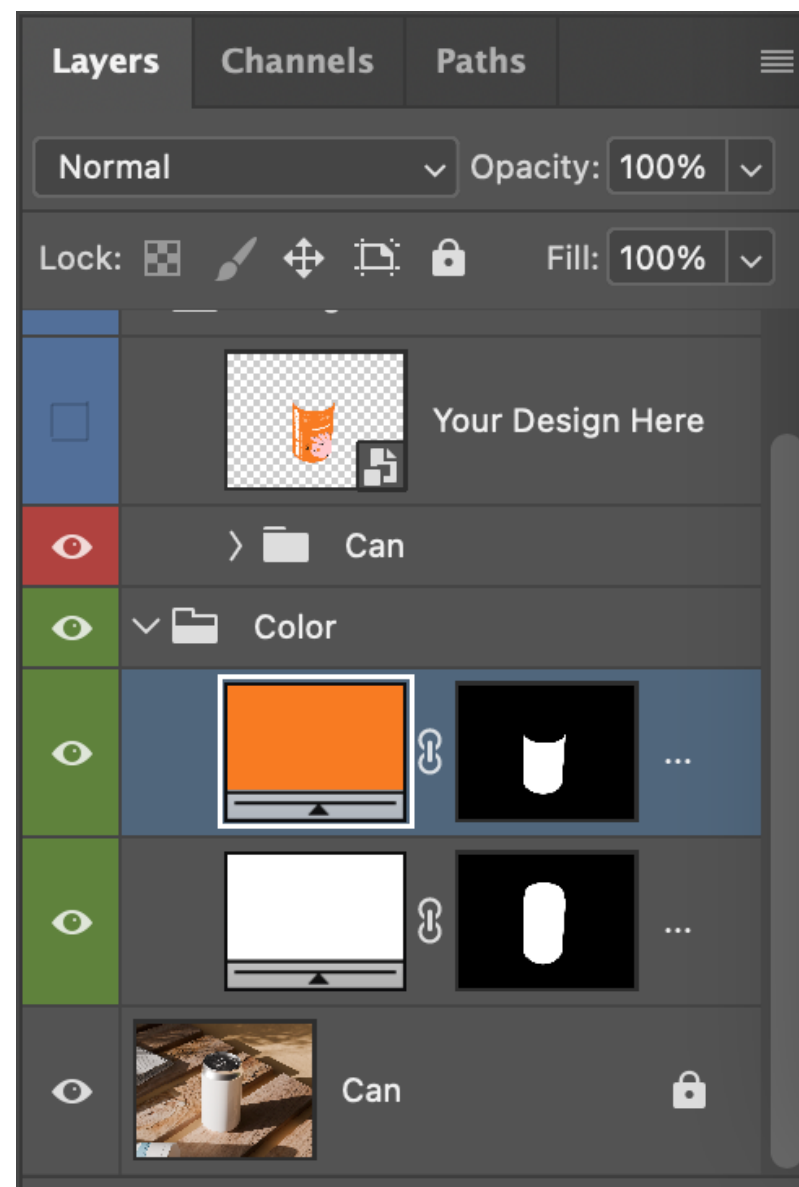

Double-click on the thumbnail of the [Your Design Here] layer in the Layers palette.
[It is highlighted in Blue. If you don't see it, open the folder.]

1. Photoshop will pop up open a new document in a new window. [Replace you design in this new window.]
2. Save your design, and back to your previous project tab

Customizing Your Design's Color

1. Double-click on the thumbnail of the Color Picker layer in the Layers palette. [It has color box and It is highlighted in Green. If you don't see it, open the folder.]
2. Photoshop will pop up open a new window, pick the color you want and Click OK.
