

Steps to Edit Smart Objects

1. Open the PSD file you want to work on using Adobe Photoshop.
2. Look for the Smart Object in the layers panel to locate the element you wish to edit.
3. Double-click the Smart Object icon (Seafoam Color) to open it in a new window.
4. Modify the contents of the Smart Object—such as replacing an image, adding new text, or making adjustments.
5. Save your changes and close the Smart Object window. The updates will automatically appear in the main document
