

Mockup Simple Tutorial

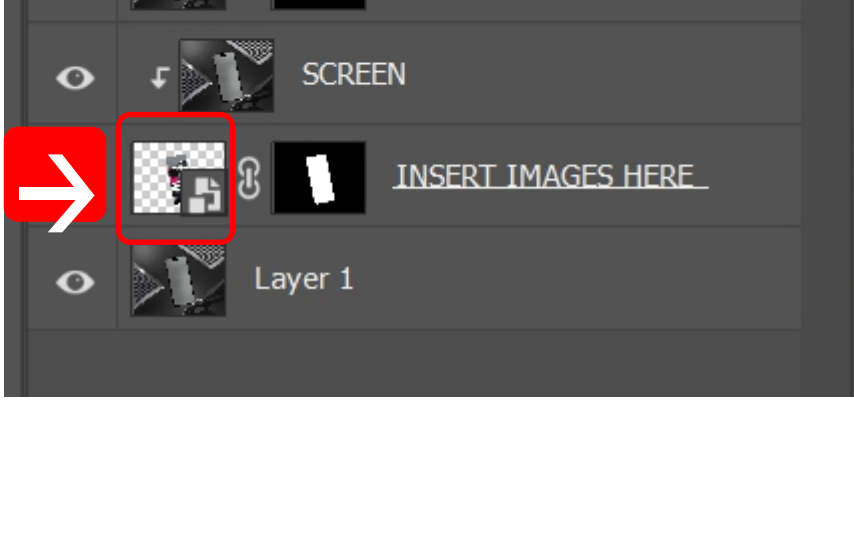

1. Open the PSD file

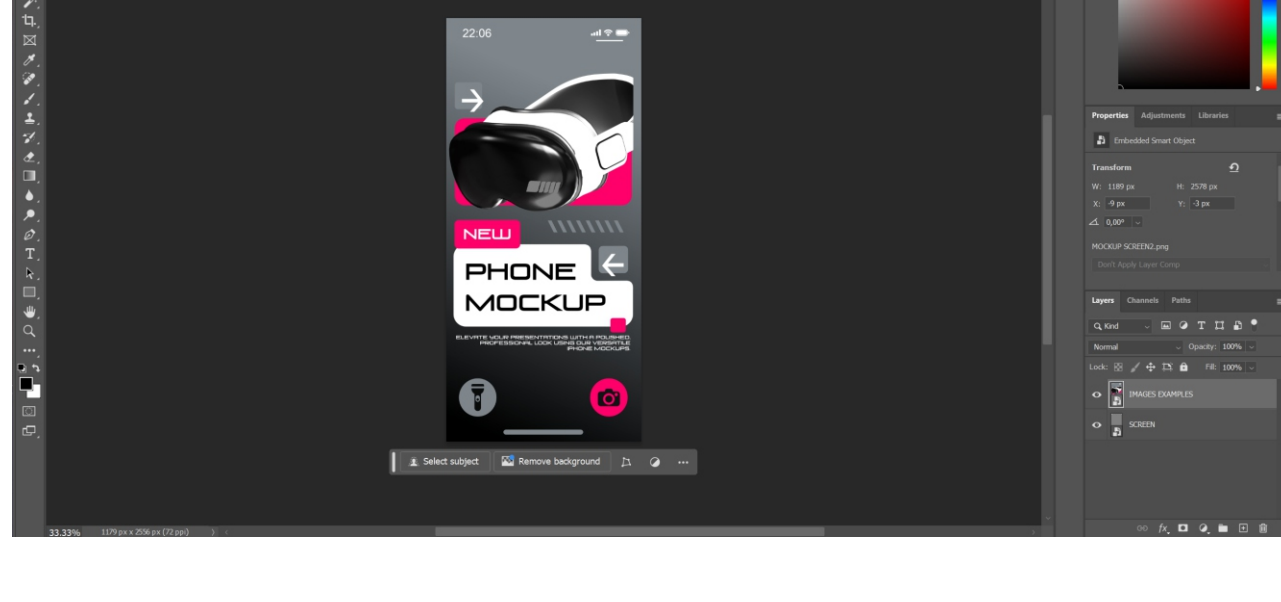

2. Go to Layer Tab

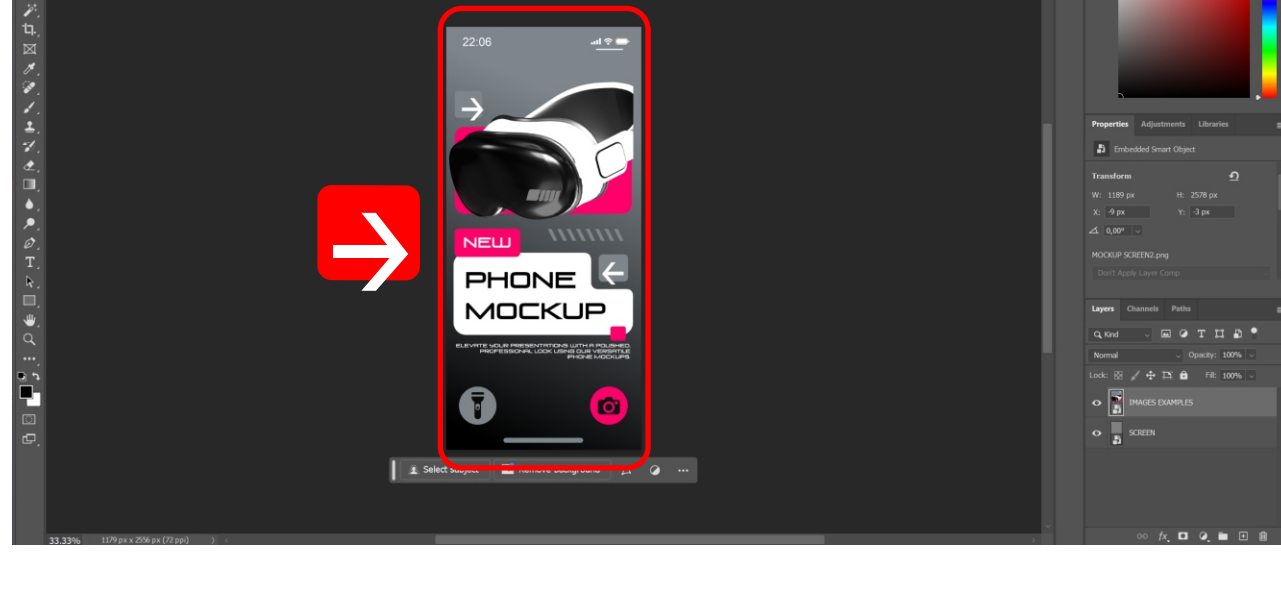

3. Double Click the "INSERT IMAGE HERE" Layer

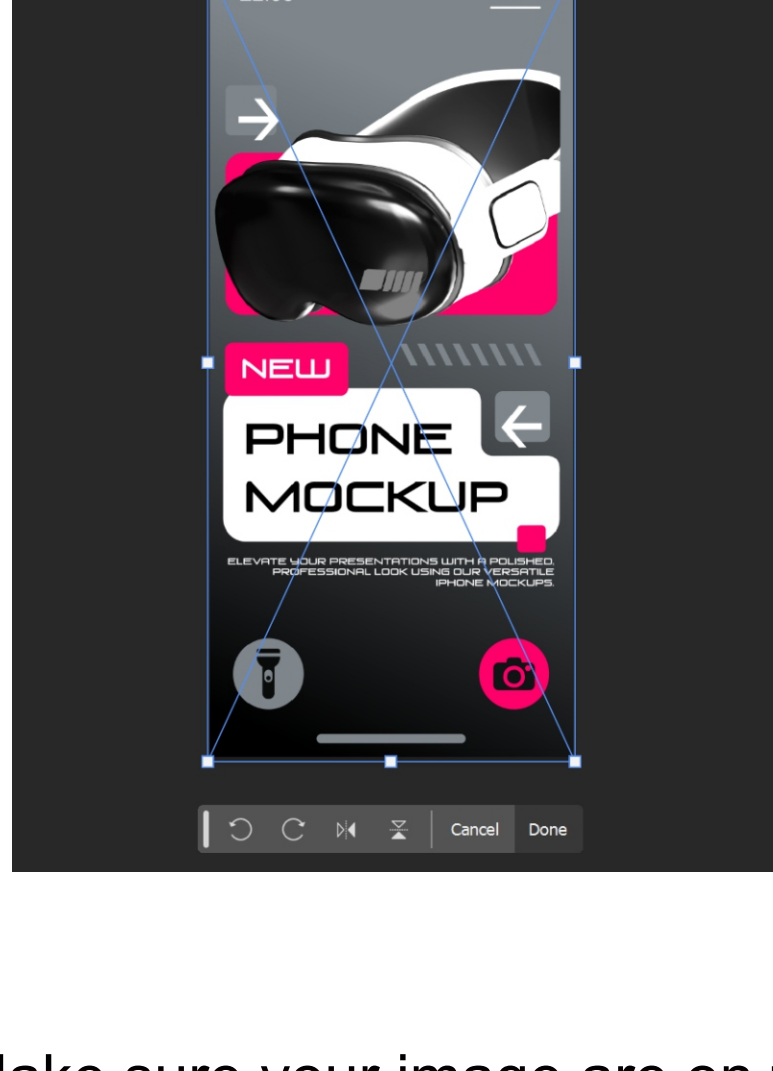

4. It will open the new tab like shown below

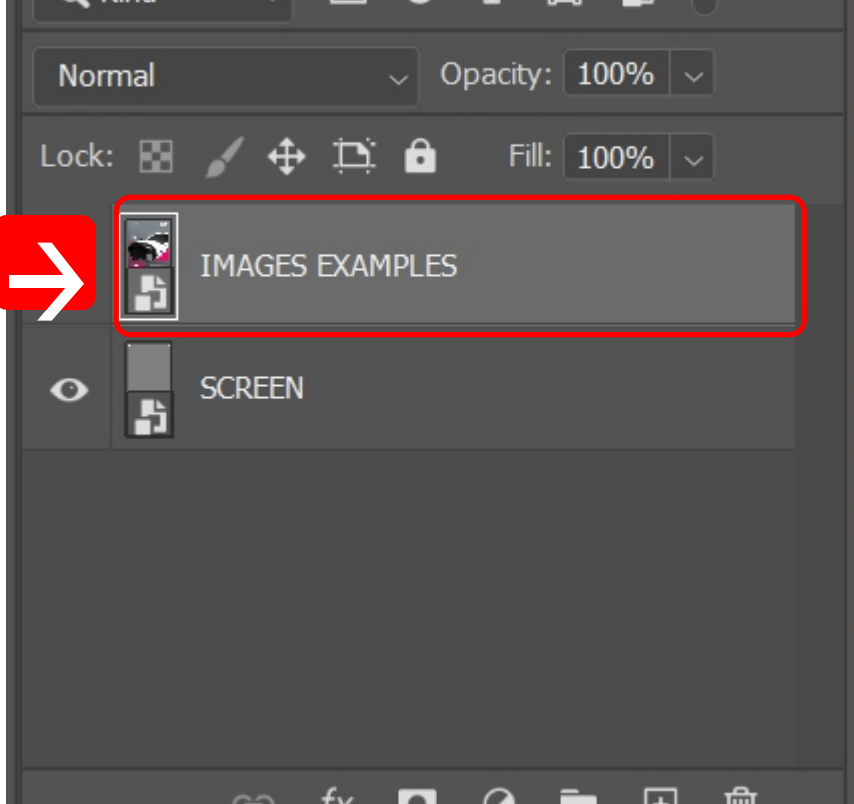

5. You can drag and drop your image here

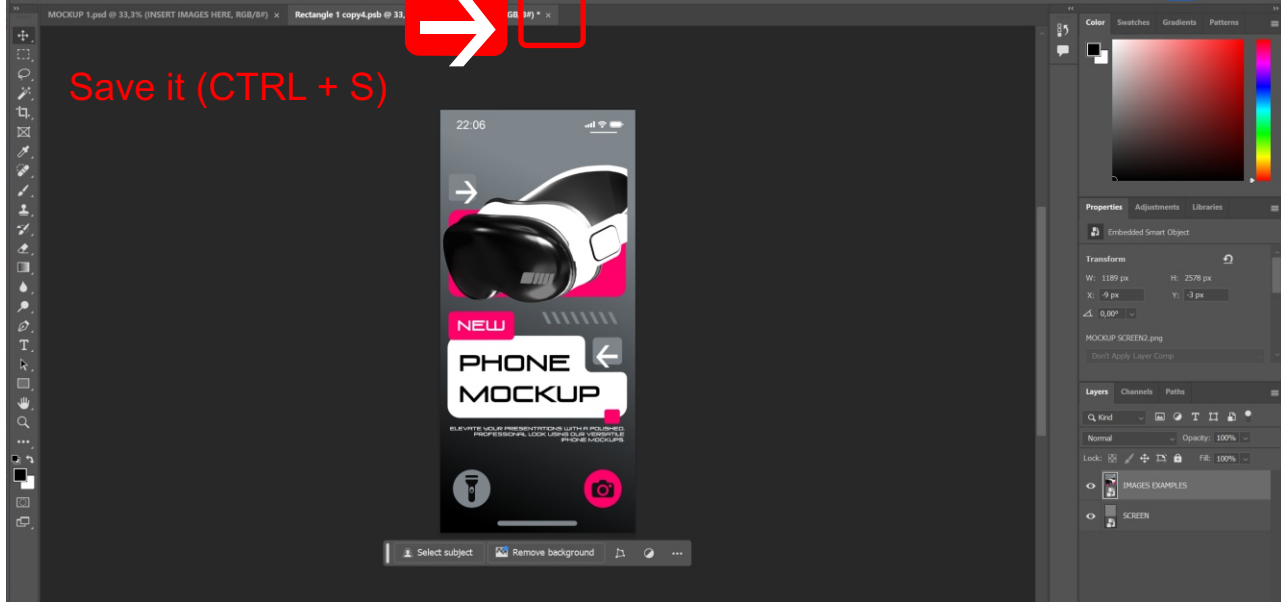

6. Resize the Image to fit the mockup size

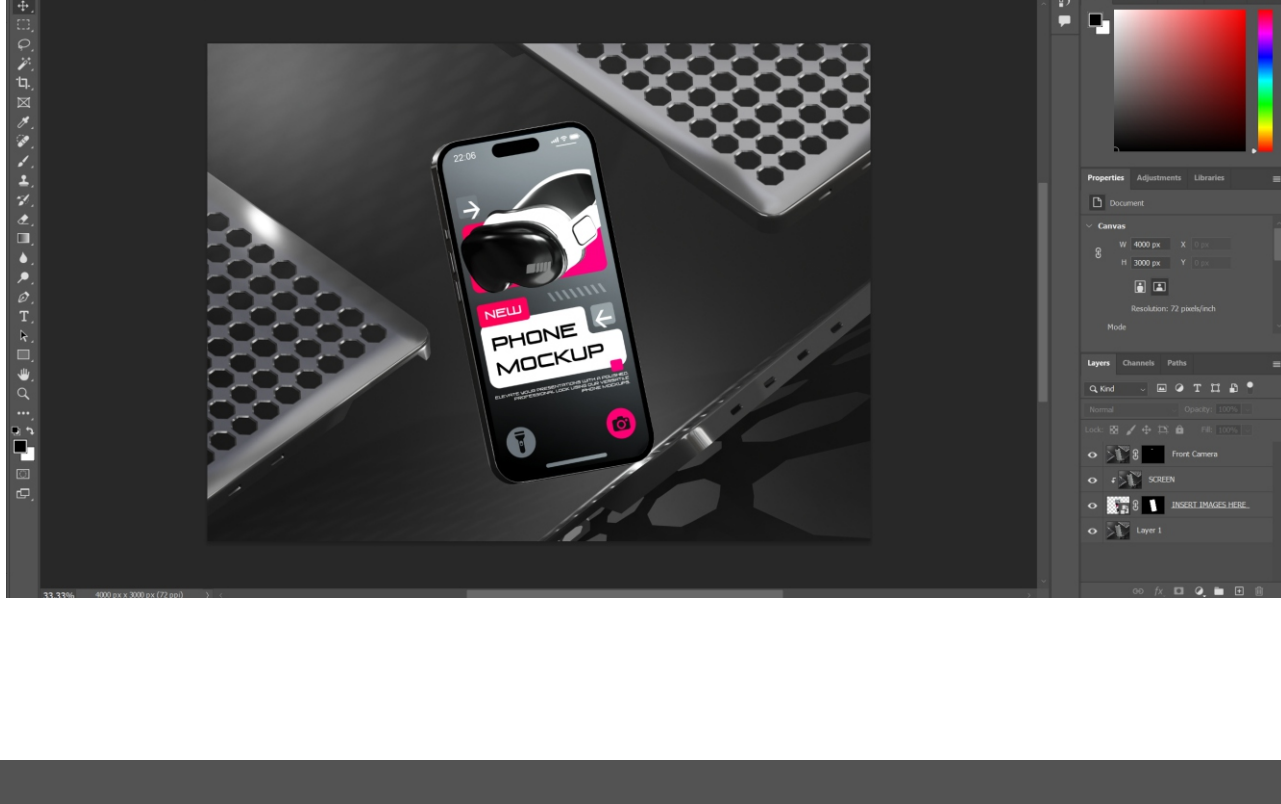

7. Make sure your image are on top of the layer

8. Save it (CTRL + S) and close the tab

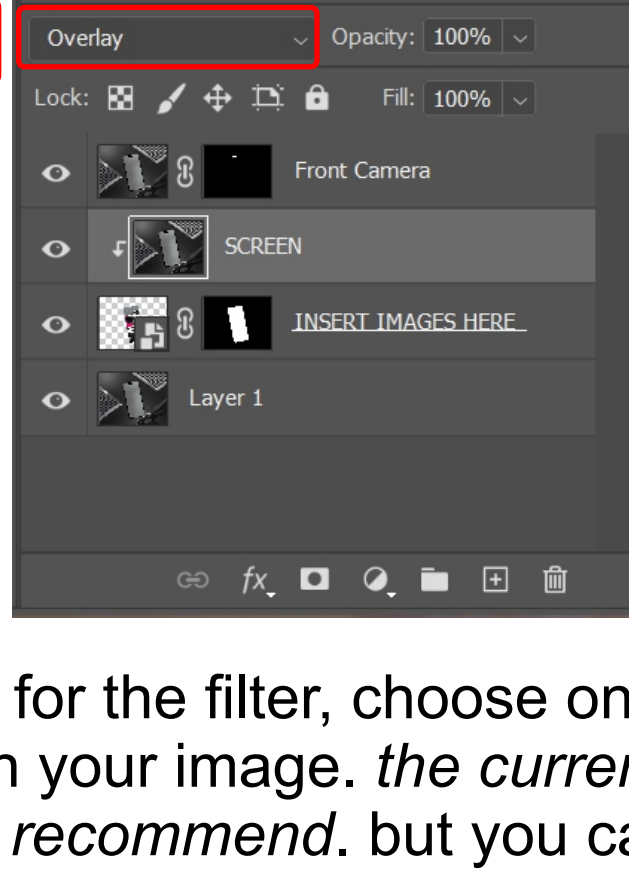

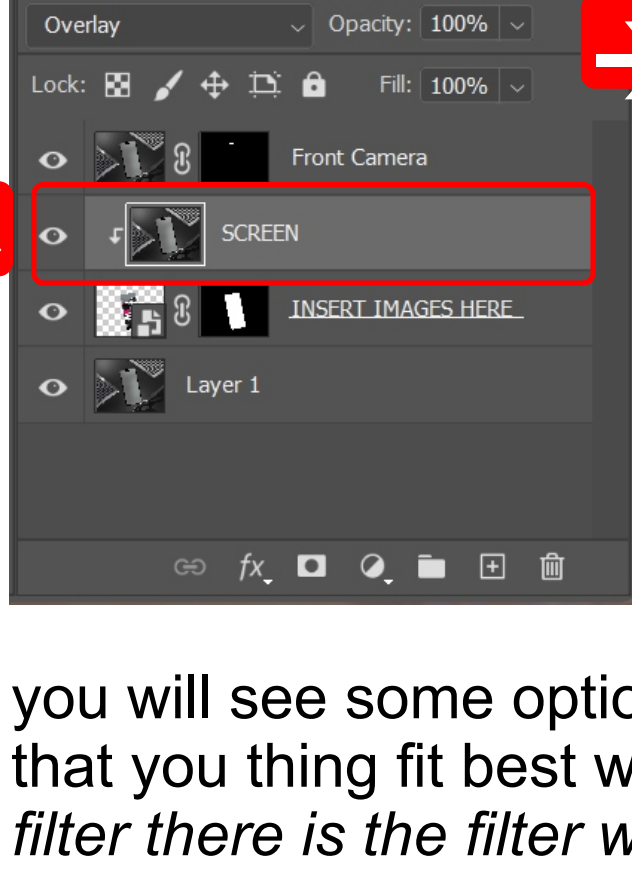

9. Done!

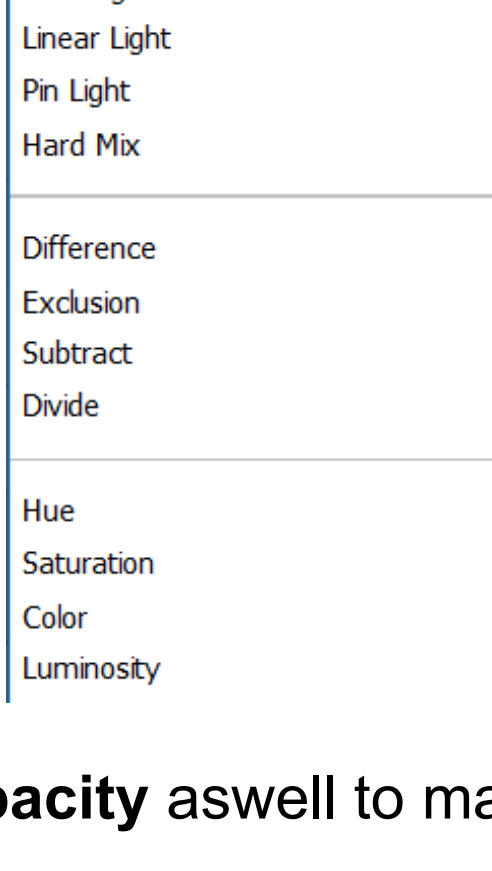

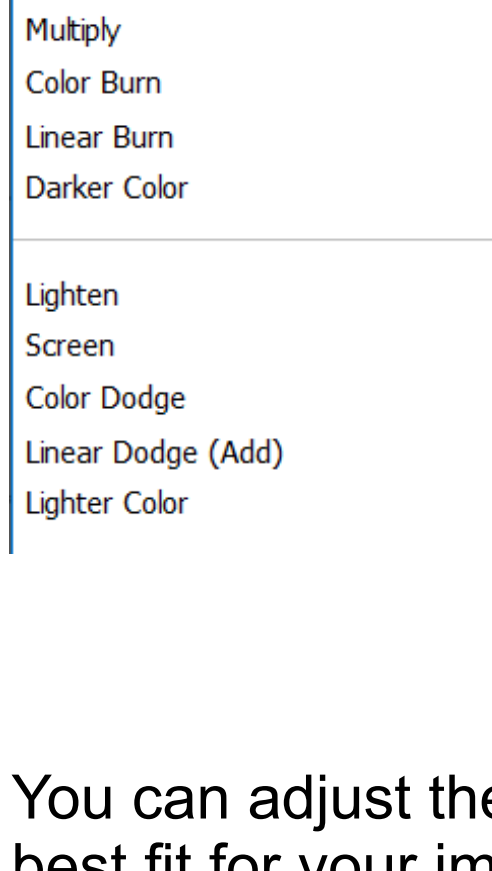

*OPTIONAL EDIT

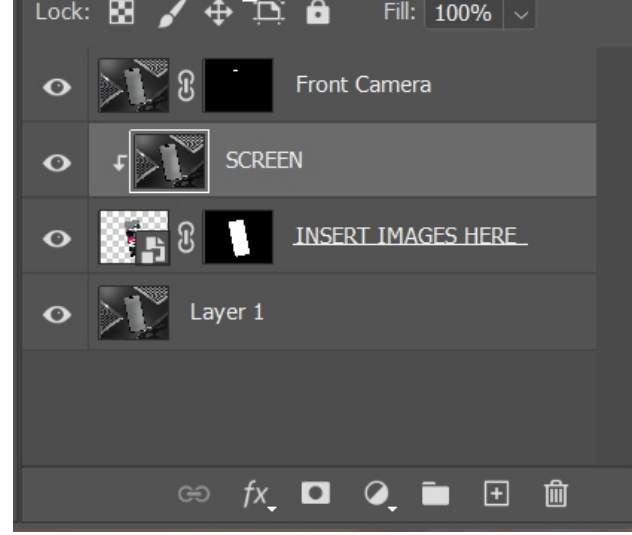

1. You can adjust the screen brightness by click the "SCREEN" Layer. Then, choose the Filter tab as shown below :

you will see some option for the filter, choose one that you thing fit best with your image. *the current filter there is the filter we recommend.* but you can edit it as you want. since every different image would have its own filter that fit.

You can adjust the **Opacity** aswell to make the best fit for your image.

done, thankyou!
