

Elegant Corporate Package^{v4.0}

User manual

Hello, dear colleagues!

Thanks for buying this template. Here is a step-by-step manual to use this project.

QUICK START

0) Download and setup Nexa font. (<http://fontfabric.com/nexa-free-font>) It's free. This font were used in the project.

1) Open "**elegant corp package.aep**" file in after effects.

2) You see a 4 open compositions.

- *_Logo placeholder*. Use this comp for place your logo. Do it in the beginning and forget about this compor or close it.

- *Presentation #1 Core Comp*. Its comp i have put all the shortened compositions. Intro video has been created by edit and render this comp.

- *Presentation #2 Clean Corporate*. This comp contain a settings for corporate presentation where you can edit the inside comp and create your own video.

- *Presentation #3 Clean Corporate +Product*. Here you can find a corporate + product (service) presentation.

3) Now you should choose 1 of 3 from remaining comps. For example you took *Presentation #2 Clean Corporate*. Open it and start build your own presentation.

4) You should open all the sandtone color comp and edit the content inside. Edit the textes, replace the photos, logos, edit graphs values etc. A little below you will find complete discription of settings of all provided comps.

5) You can choose any available comp in *Scenes* folder. Simple drag it on timeline, adjust the transition time inside this comp in the first layer's keyframes. After simple extend that comp on timeline and add the transition. (All type of them available in "Transitions" folder),

6) Adjust sound and end dark fade and click render.

For further editing see text below.

DEEPER EDITING

Project were created in simple way so advance editing isn't hard. Here are some possibilities:

1) You can swap any comp by select one from collection in "Scenes" folder and draw on highlighted comp in timeline with pressed "ALT" button.

2) Package contain 21 animated icons. In any composition where you can find an icon you can swap it. Just select the layer and select new icon in folder *Scenes > 5. Elements > Icons* and drag on timeline with ALT holded button.

3) Green layers on timeline - transitions. If you want to change the their looks drag and swap composition from *Transitions* folder.

5) Of course you can change everything in all comps. Add more layers or delete some of them, extend the length of comp or reduce etc

COMPOSITIONS EDITING

Here you can find a solutions for editing of each compositions in the package. Most of them are easy to change and all contain a hints on the layers.

INTRO & LOGO REVEALS

1) *All Layer reveals*. Logo was changed after editing *_Logo Placeholder* comp. You only have to change the text discription on yellow layer.

2) *Main title and Title 1,2,3*. Edit the discription and main title in the inner comp.

CORPORATE PART

1) *Awards*. Edit all yellow layers.

2) *Clients*. Edit all yellow layers and logo placeholders compositions inside *Clients Inside*.
