BUILDING VIDEO

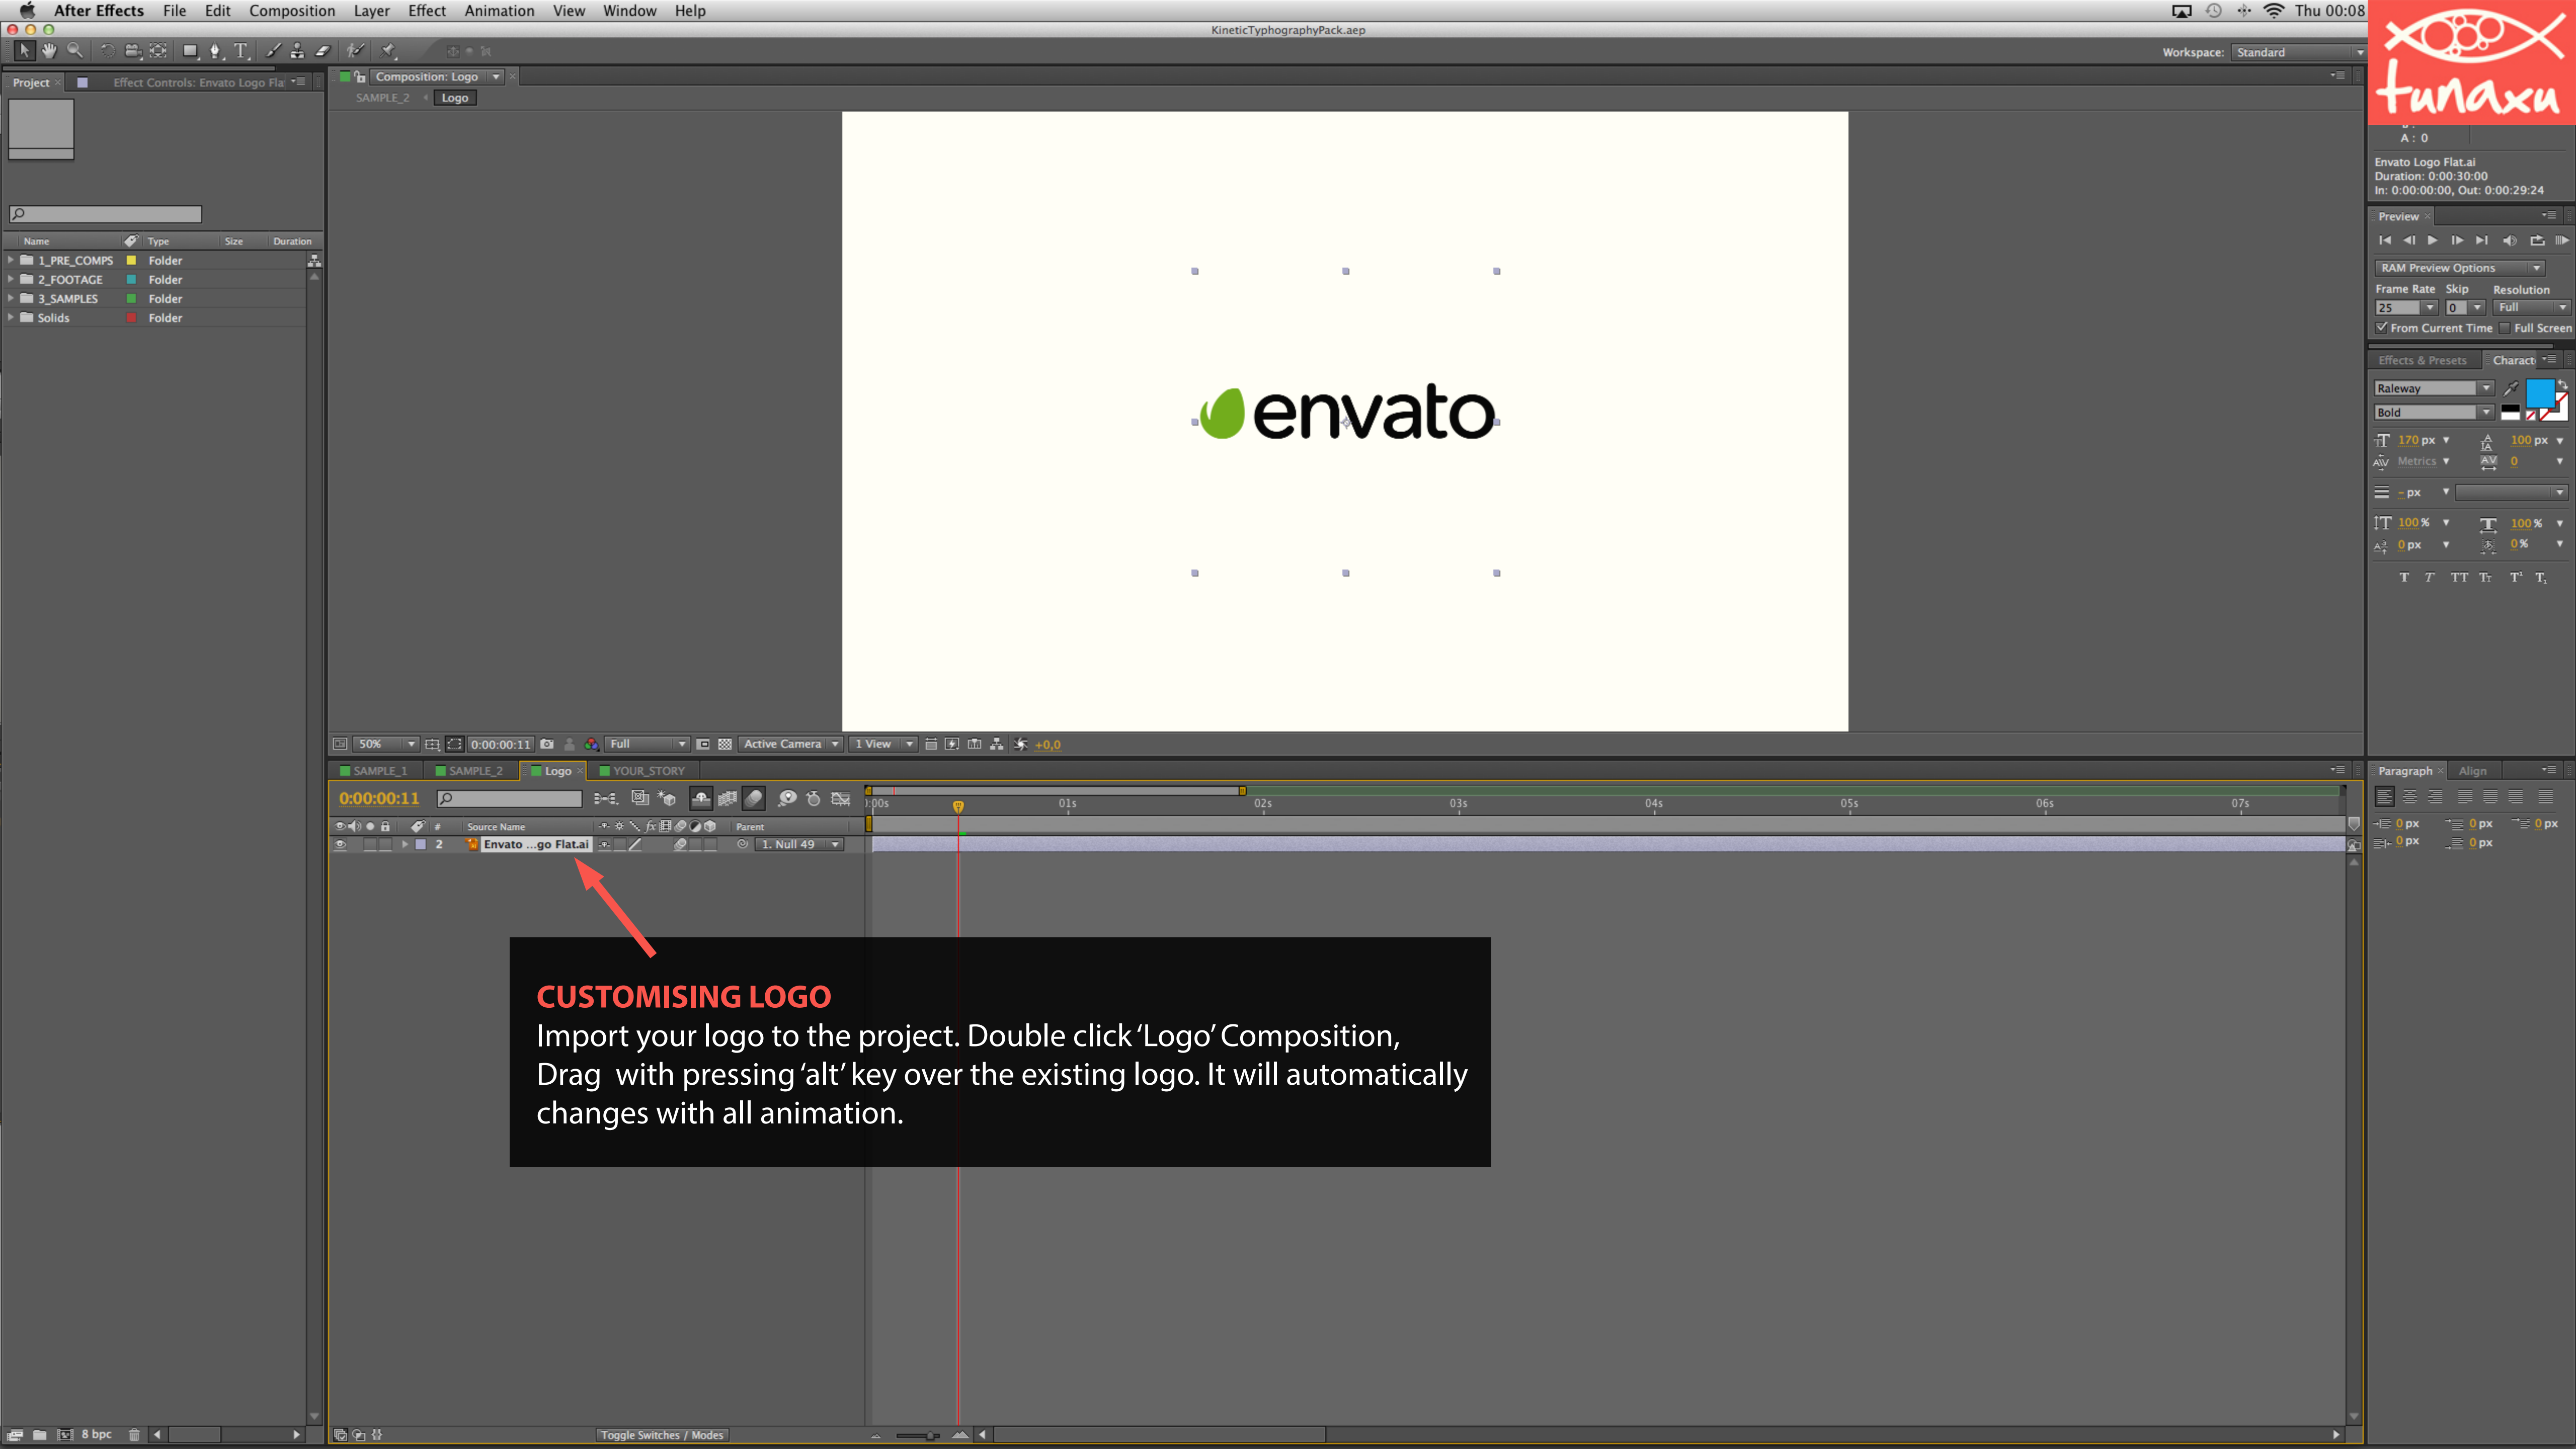

Drag and Drop compositions that you want to the scene. Each compositions have in and out transitions, so you can drop another one over the previous comp on timeline.

P.S. When you need to use same composition do not forget duplicate that composition before drag and drop to the scene. Because when you edit same named composition first one will be changed too. So duplicate composition before drop and it will be automatically have a different name. For example '01_ANI' will be '01_ANI 2'.

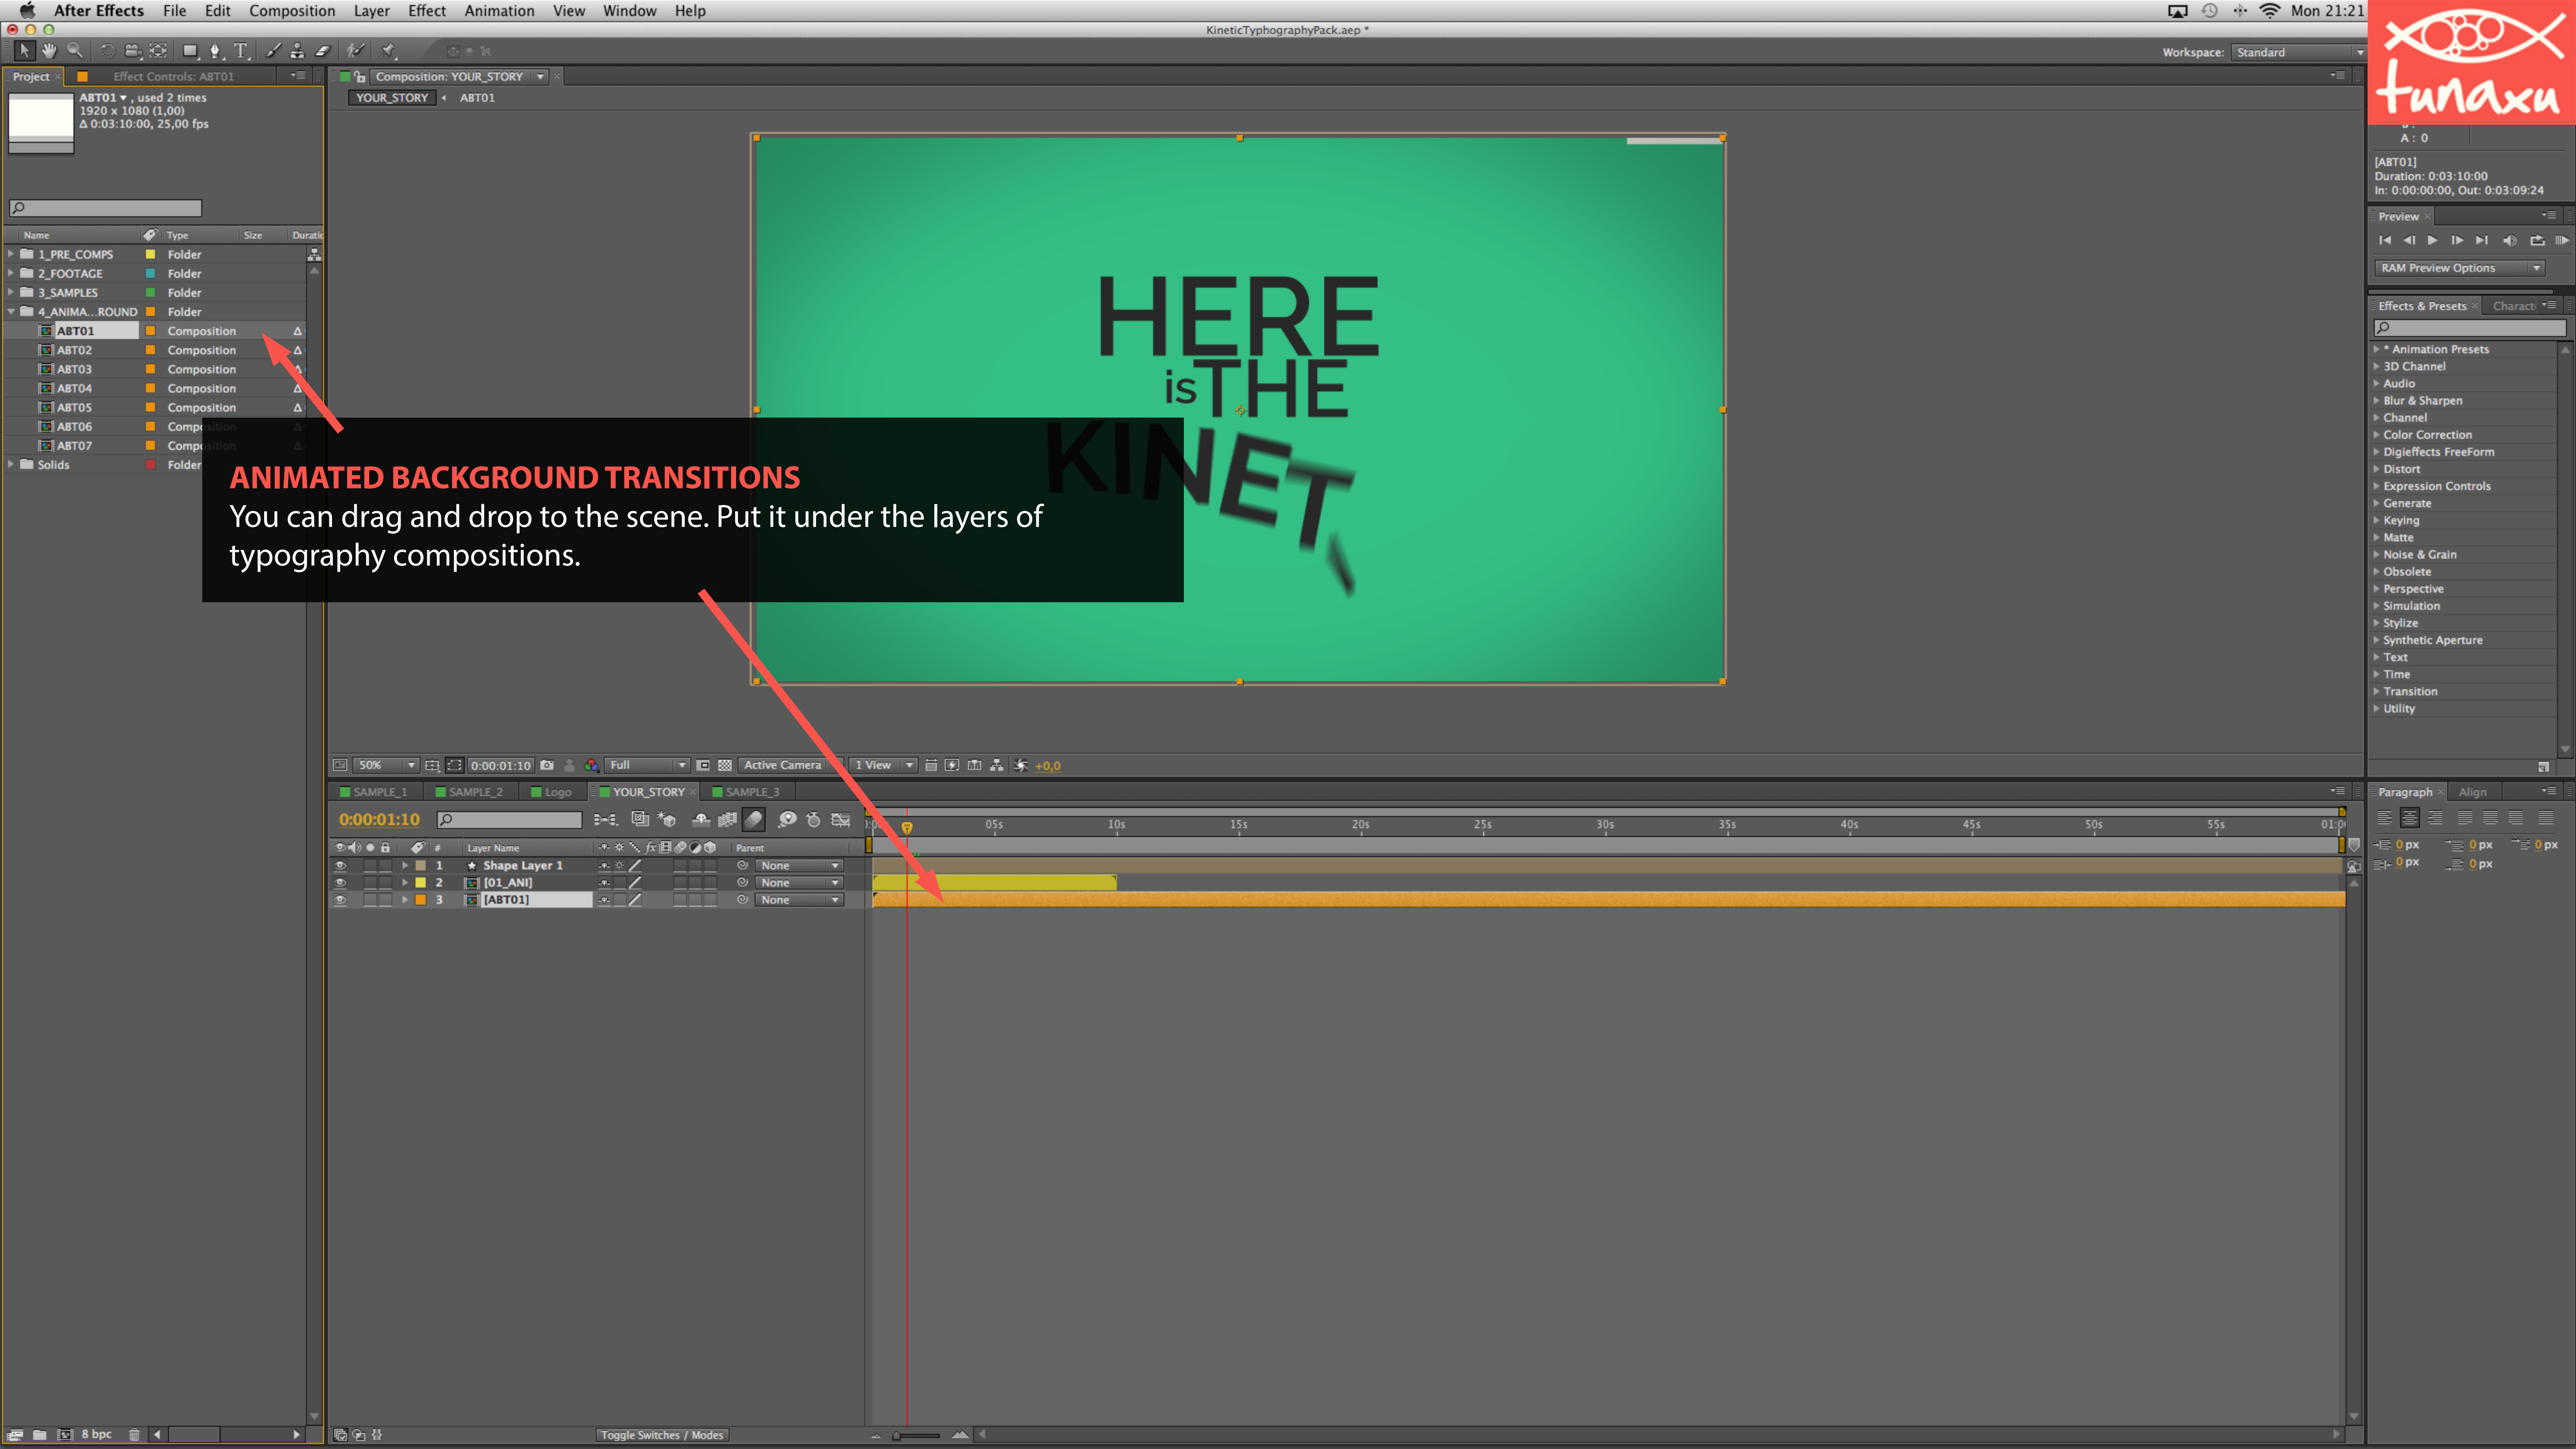

SETTING COMPOSITION DURATION

Right click to the composition and set the duration.

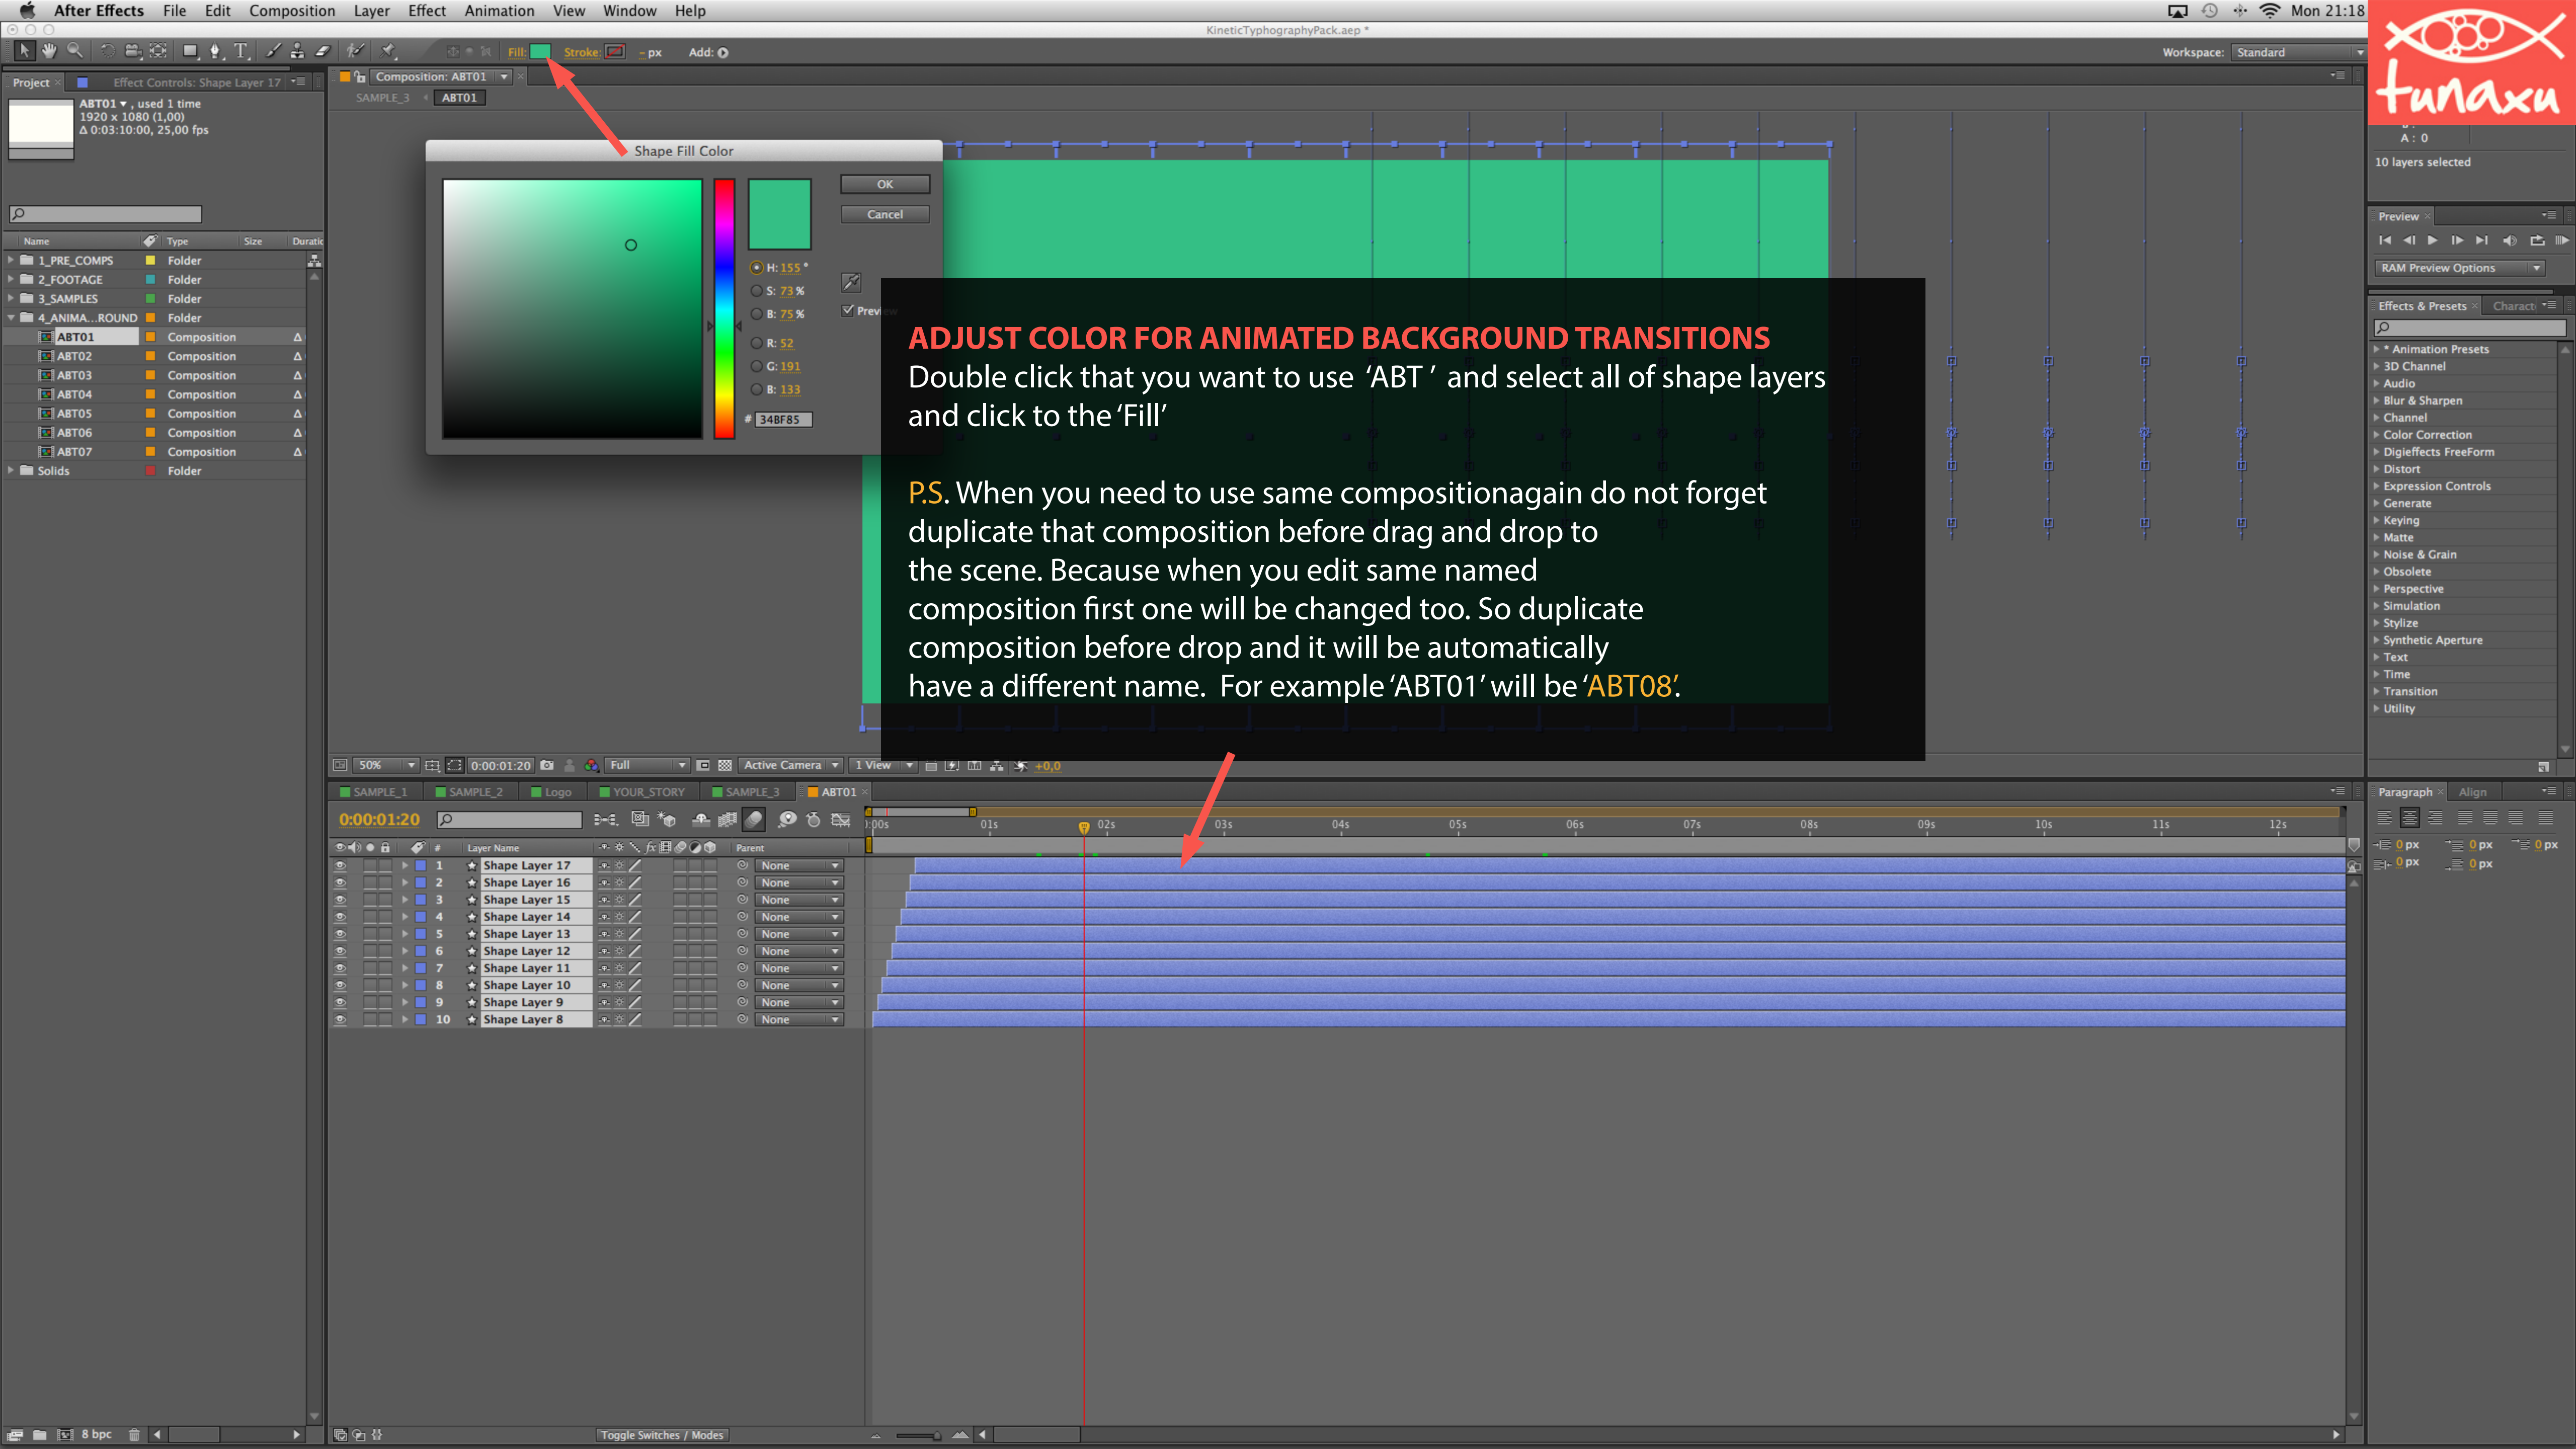

CUSTOMISING LOGO

Import your logo to the project. Double click 'Logo' Composition, Drag with pressing 'alt' key over the existing logo. It will automatically changes with all animation.

ANIMATED BACKGROUND TRANSITIONS

You can drag and drop to the scene. Put it under the layers of typography compositions.

ADJUST COLOR FOR ANIMATED BACKGROUND TRANSITIONS

Double click that you want to use 'ABT ' and select all of shape layers and click to the 'Fill'

P.S. When you need to use same composition again do not forget duplicate that composition before drag and drop to the scene. Because when you edit same named composition first one will be changed too. So duplicate composition before drop and it will be automatically have a different name. For example 'ABT01' will be 'ABT08'.
